PAIRING YOUR DEVICE (REQUIRED FOR OPERATION):
1. Ensure your streaming device has Bluetooth® enabled and that power is applied to the CCS-BT. (The blue LED on the CCS-BT will blink to indicate it is in pairing mode.)

2. Within your streaming device's Bluetooth® setup menu, select "CCS-BT" from the list of pairable devices. No Pin Code is required.

3. When successfully connected, the Blue LED on the CCS-BT will stop blinking and remain lit. A single beep will be heard through the connected audio system.

Multiple devices can be paired to the CCS-BT, but only one streaming device can connect at one time.

The CCS-BT will remember the last device that was connected to it and reconnect with it automatically. If that streaming device is not active, then other paired streaming devices can connect manually, or new streaming devices can be paired.

When a connected streaming device is out of range for more than one minute, the CCS-BT will automatically disconnect this streaming device and return to pairing mode (LED will blink).

CONTROLLING AUDIO PLAYBACK:

1. Once connected, audio is controlled from the streaming device. This includes volume and media selection.

2. The CCS-BT can be installed out of sight, as it has no user controls that need to be accessed.
